Meters will be reset at the beginning of each month including pre-paying customers. No block categorisation will be done. All customers will buy the initial 500 kWh in the month at the first block tariff and then advance through the blocks to their ultimate consumption for the month.

“A 2c/kWh Demand side Management (DSM) Levy will be charged to all customers that consumes above 500kWh per month. Customers on business prepaid tariff will be charged 2% municipal surcharge on their purchases excluding VAT and 2c DSM levy amount”.
